\$10m facilities completed

Candetti recently completed the \$10 million terminal facilities at the RAAF Edinburgh Base.

This innovative project includes a multi-bay warehouse facility, terminal, check-in facilities, baggage handling, storage, transport carousels,

security clearance and scanning areas, quarantine, customs and associated office areas. Candetti also completed works on the hardstands, tarmac and aprons.

The company gained a complete understanding of RAAF and Edinburgh Base operations, developing quality plans and

delivery systems to address the specific requirements of Defence, Airside and Landside works.

It continues to have a close alliance with the RAAF, with future works planned for South Australian and Queensland operations. Meanwhile, Candetti has appointed project manager Cameron MacKellar

to the role of Business Development Manager. His appointment coincides with the company securing a design and cost feasibility study for a regional aquatic centre for the Alexandrina and Victor Harbor Councils, and upcoming work for the Defence Force in South Australia and Queensland.
