

Watershed moment for aquatic sport lovers

SPLASHDOWN: The new South Australian Aquatic Centre at Oaklands Park opened to the public yesterday and making the most of the state-of-the-art facility on a balmy late-April day was Bridget Barson, 9, of Marion, who helped mum Emma and brother Miles, 5, to cool down, while, inset, two-year-old Matilda enjoys splashing around among the fountains.

HEADACHES ARE NOT NORMAL

Headaches are triggered by many everyday events! However, your underlying neck problem is the most likely, silent and hidden cause.

If you suffer from recurring headaches, tension, poor posture, neck, shoulder or arm pain, it's possibly due to a biomechanical neck problem. Therefore, Chiropractic may be one of your best and safest solutions.

Only a Chiropractor can determine if you have a chiropractic condition.

Spinecare Chiropractic can scientifically diagnose the extent of your chiropractic condition, in order to properly correct your problem, rather than just offering never ending and temporary pain relief.

Special Health Offer

To start you on the road to recovery, we wish to extend to you...

- Initial Consultation
- Spinal Examination
- Paraspinal Thermal Imaging
- Orthopaedic Examination

Treatment and/or X-Rays not included

\$37.50

Limited Appointments
